EXPERIENCE

Assistant System Engineer — Tata Consultancy Services Jan 2025 – Present · Remote/Hybrid

- Full-stack delivery across Python/Django (legacy optimization) and MERN (new feature development) on client projects.
- Built the Client Relationship & Analytics Dashboard: Express.js REST APIs + MongoDB schema design (+25% data-retrieval speed); React + Redux Toolkit UI with Jest + React Testing Library (+40% coverage).
- Cut key page-load times ~30% by optimizing Django ORM queries; shipped REST APIs on both Django REST Framework and Node.js/Express.

Freelance Developer — MLM Platform (remote) May 2023 – Jul 2023

- Deployed a Django app to AWS EC2 with Docker; Nginx → Gunicorn, systemd + cronjobs.
- GitHub Actions CI/CD pipeline deploying main to production; user/permission management.
